

Drums, funnels,
pressure vessels and
Special constructions
made of stainless steel

New at BOLZ INTEC

A proven patent from New Zealand now also for barrels

The BOLZ-BFM® barrel

Safety:

- + Maximum safety: no leakage of the product/dustproof
- + View of product, condition behaviour and level control during operation possible
- + Easy fault management in case of product congestion

Weight/Handling

- + Up to 60% less weight compared to previous stainless steel solutions
- + Can be mounted safely and quickly without tools
- + For drum diameters 400; 450 and 600 mm

Modular

- + Modular system: filling, storage, emptying coordinated and combinable
- + Can also be used on existing lidded drums and tri-clamps with adapter
- + Transparent, temperature-resistant, abrasion-resistant polyether-based polyurethane

Certified

- + Hygienic Design (EHEDG), GMP standard, made of stainless steel 1.4404/AISI316L
- + Atex-certified, life-compliant according to Regulation (EU) 10/2011
